PEER MEDIATION

UNDERSTANDING AND PREVENTING BULLYING IN SCHOOLS THROUGH COLLECTIVE RESPONSIBILITY AND PROACTIVE STRATEGIES

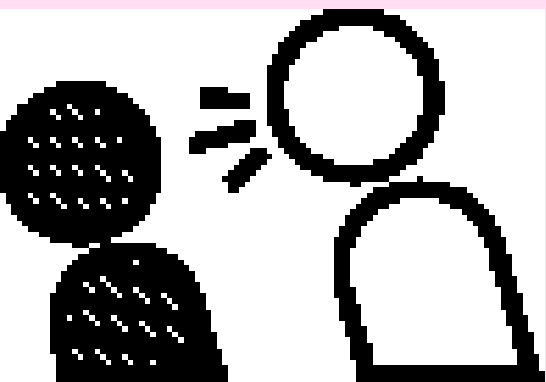

DEFINITION OF BULLYING IN EDUCATIONAL CONTEXTS

Bullying is a deliberate and repeated aggressive behavior intended to hurt, intimidate, or humiliate another person, often involving a power imbalance. It can be physical, verbal, psychological, social, or digital (cyberbullying).

TYPES OF BULLYING:

- **Physical: Hitting, pushing, damaging belongings**
- **Verbal: Insults, teasing, name-calling, threats**
- **Social/Relational: Exclusion, spreading rumors, public humiliation**
- **Cyberbullying: Harassment via social media, messaging, or other digital platforms**

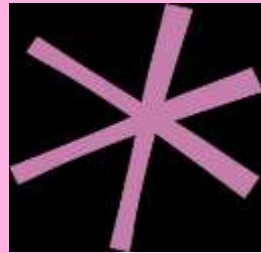

COMMON SITUATIONS OF BULLYING IN SCHOOLS

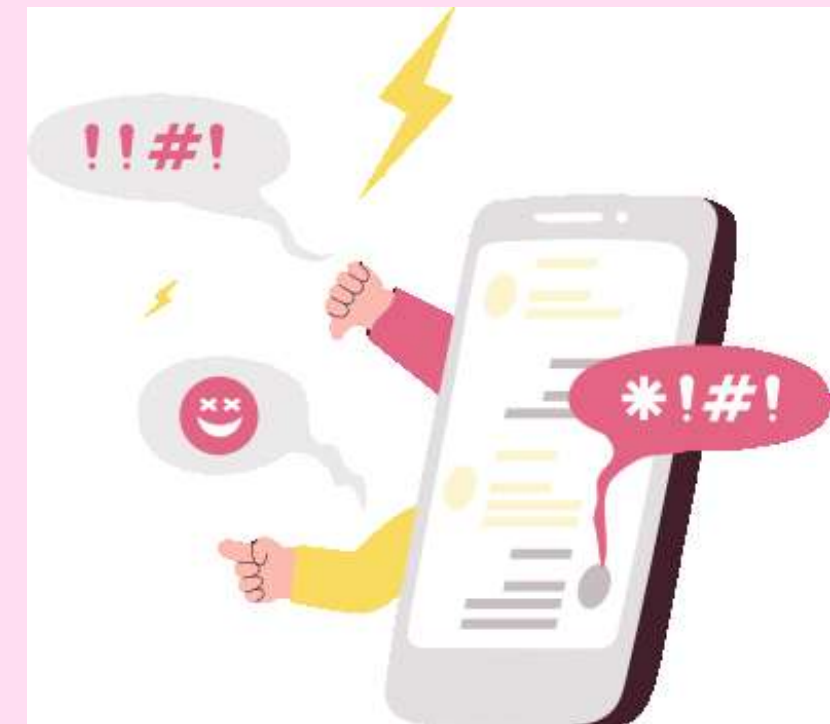

- Repeated verbal abuse in corridors or classrooms
- Physical aggression on playgrounds or during breaks
- Online harassment through class chat groups or social networks
- Targeted exclusion from group work or social activities
- Students mocking peers with learning differences or

PROBLEMS LINKED TO BULLYING

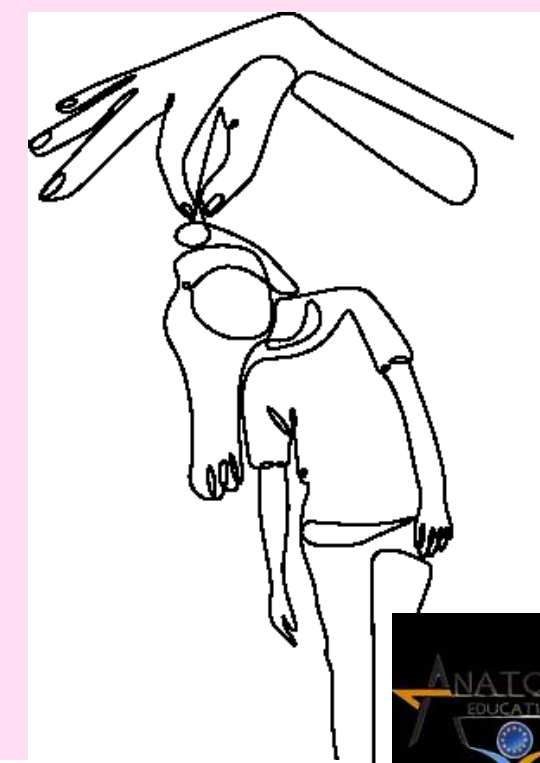

- **Decreased academic performance and motivation**
- **Increased anxiety, depression, and social withdrawal**
- **Higher school dropout rates**
- **Risk of self-harm or suicidal thoughts (in severe cases)**
- **Negative school climate and teacher frustration**

KEY ACTORS INVOLVED

- **The Bully:** May seek power, control, or attention; often insecure or influenced by group dynamics
- **The Victim:** Often perceived as different or vulnerable; may internalize the abuse
- **The Bystanders:** Witnesses who can either reinforce the bullying or help stop it
- **Teachers/Staff:** Responsible for intervention and prevention
- **Parents:** Can support or ignore warning signs

RESPONSIBILITIES

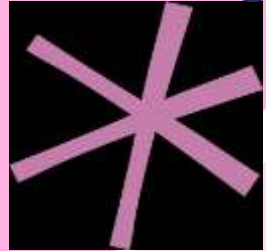

School Staff:

- **Detect and report bullying cases early**
- **Ensure consistent anti-bullying policies**
- **Foster a culture of respect and empathy**

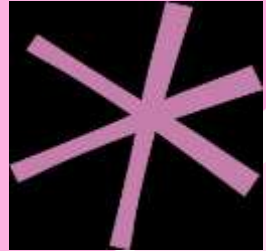

STUDENTS:

- **Speak up when witnessing bullying**
- **Support peers who are victimized**
- **Participate in peer mediation or student council actions**

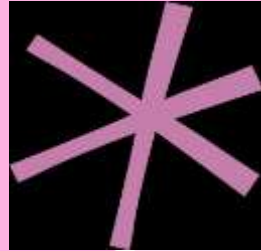

PARENTS:

- **Monitor children's behavior and emotional well-being**
- **Communicate regularly with teachers**
- **Encourage open conversations at home**

SCHOOL LEADERSHIP:

- **Provide training and protocols**
- **Integrate anti-bullying education in the curriculum**
- **Establish safe reporting mechanisms**

6. SOLUTIONS AND PREVENTION STRATEGIES

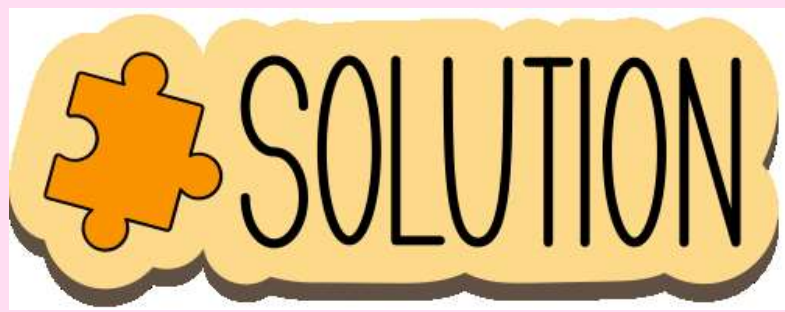

A. Whole-School Approach

- **Clear anti-bullying policies and school charters**
- **Staff training and awareness campaigns**
- **Regular class discussions and student-led initiatives**

B. Peer Mediation and Conflict Resolution

- **Train student mediators to handle minor disputes**
- **Empower students to lead peaceful resolution efforts**

C. Restorative Practices

- **Focus on repairing harm and restoring relationships rather than punishment**
- **Facilitate restorative circles after incidents**

D. Social-Emotional Learning (SEL)

- **Teach empathy, self-awareness, and communication skills**
- **Embed SEL activities in daily lessons**

E. Digital Citizenship Programs

- **Educate students on online behavior and cyberbullying prevention**
- **Encourage respectful use of technology**

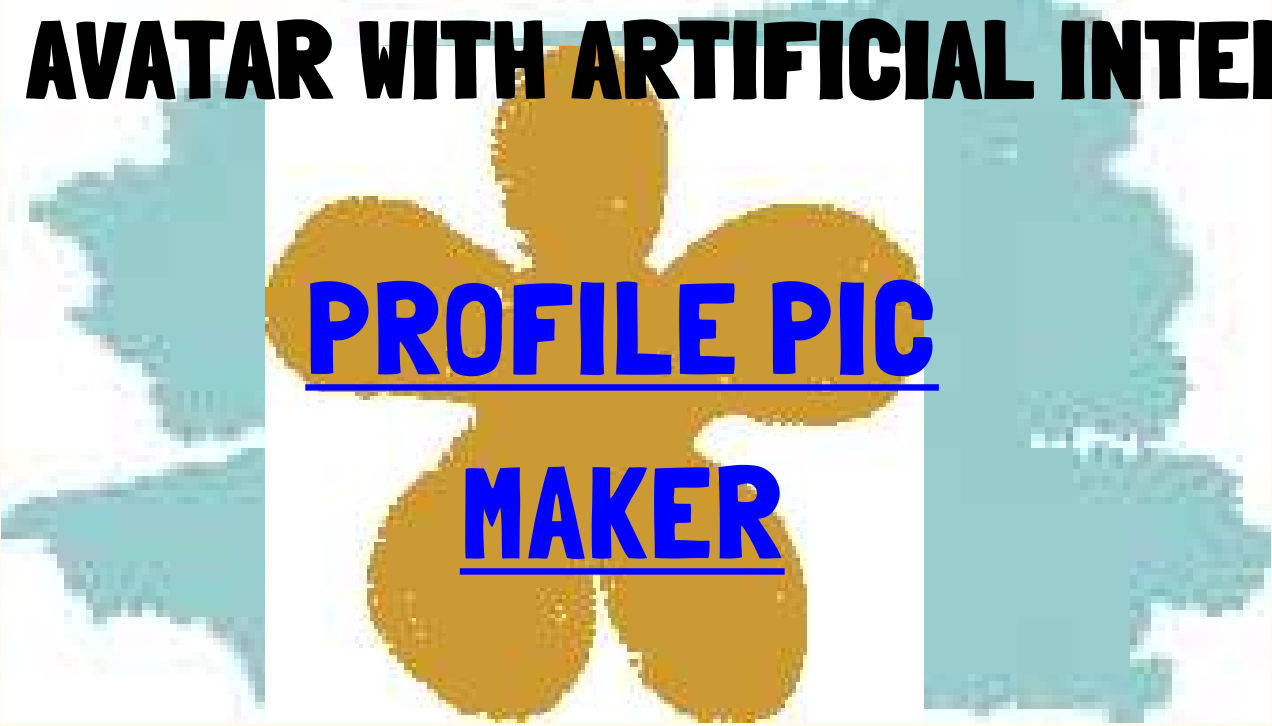

Rytr is an AI writing assistant that helps you create high-quality content in just a few seconds at a cost significantly below market rates.

Rytr is an AI-powered content marketing platform that enables users to generate great copies at scale for their blogs, websites, social media posts, emails, and more.

Video creation with AI has been made 10 times simpler and faster. Transform your ideas into compelling content with AI voices using our tool, from text to video.

AVATAR WITH ARTIFICIAL INTELLIGENCE

A screenshot of a web application interface. At the top, the text 'AVATAR WITH ARTIFICIAL INTELLIGENCE' is displayed in bold black font. Below it, there is a large, stylized orange flower-like shape centered on a white background. The words 'PROFILE PIC' and 'MAKER' are written in blue, underlined, bold capital letters, stacked vertically over the center of the orange shape. The entire interface is set against a light yellow background.

PROFILE PIC
MAKER

When you upload an image to the website, it automatically removes the background of the image and allows you to adjust settings such as shadows and colors to download a suitable profile photo. There is also a rich library of background options available for changing the background.

AVATAR WITH ARTIFICIAL INTELLIGENCE

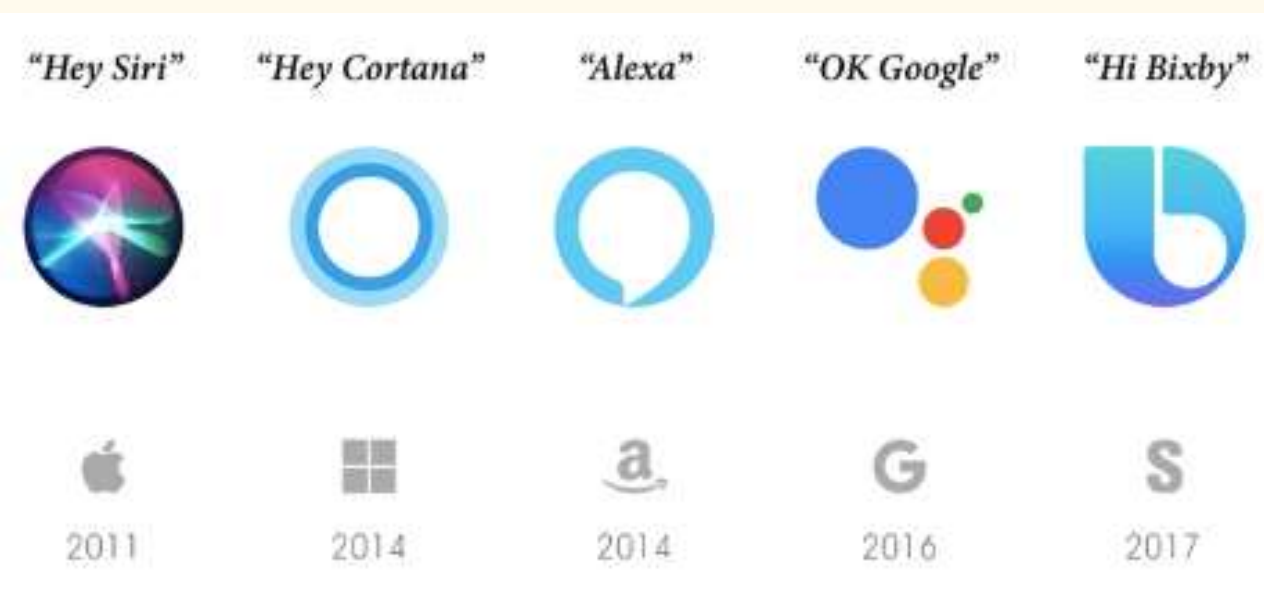

A screenshot of a web application interface. At the top, the text 'AVATAR WITH ARTIFICIAL INTELLIGENCE' is displayed in bold black font. Below it, there is a large, stylized orange flower-like shape centered on a white background. The words 'READY PLAYER' and 'ME' are written in blue, underlined, bold capital letters, stacked vertically over the center of the orange shape. The entire interface is set against a light gray background.

READY PLAYER
ME

You can create avatars using the Metaverse Avatar Platform 'Ready Player Me' and import them into other metaverse and avatar platforms.

VIRTUAL ASSISTANTS

Natural Language Processing (NLP) is one of the most challenging areas of artificial intelligence, aimed at maximizing human-computer interaction or enhancing communication between speakers of different languages. In NLP, solutions are developed using deep learning, machine learning, statistical analysis, and rule-based approaches. NLP is used for a wide range of applications, from correcting spelling errors to automatic translation systems, language learning apps, and personalized virtual assistant applications.

This tool allows you to animate your artificial photos or avatars, making them speak and say any sentences you desire.

AVATAR WITH ARTIFICIAL INTELLIGENCE

HEYGEN

HeyGen's new AI-powered video translation tool clones a person's voice and reproduces lip movements in different languages. The AI initiative HeyGen introduced a new tool called "Video Translate" capable of translating videos of up to five minutes in duration into different languages.

AVATAR WITH ARTIFICIAL INTELLIGENCE

ARTFLOW

Artflow allows users to create visual content with the help of artificial intelligence solutions.

Artflow is the world's first AI-powered video creator that enables everyone to turn their ideas into animated stories.

CHAT APPLICATIONS

CHATGPT

Although referred to as a chatbot, it is an artificial intelligence product owned by OpenAI that will surprise you with its capabilities. It responds to all your questions like a human, drawing inspiration from information in its database, and has been tested with applications like Turnitin to ensure it does not plagiarize. It is anticipated to replace Google in the future.

CHAT APPLICATIONS

MINISTUDIO AI

Children now have the power to unleash their creativity by creating their own characters and chatting with them in real-time. They can play, learn, and explore together in a safe and fun environment. The possibilities are endless with their own smart friends! Unlimited activities await, providing an immersive and interactive experience for children.

Here are five wonderful things children can safely do with our AI application:

- 👤🎨 Draw their own characters and bring them to life.
- ✍️ Chat with smart AI characters in a safe and kid-friendly tone.
- 📖 Create their own stories, riddles, quizzes, or jokes.
- ❑ Ask anything they want and expand their knowledge about the world.
- 🧠 Personalize their characters for social-emotional learning journeys through customized storytelling adventures.

CHAT APPLICATIONS

[YOU.COM](https://you.com)

You.com, Google's competitor, now offers a chatbot in search similar to ChatGPT.

AI Experiments is a showcase for simple experiments that allow everyone to explore machine learning with images, drawings, language, music, and more.

WHAT DO YOU WANT TO DO?

NEXA

Write the work you want to do to NEXA, it will tell you the appropriate tool / program.

MANY ARTIFICIAL INTELLIGENCE...

TOPAPPS.AI

A fantastic website where you can access many artificial intelligence applications.

Search for AI applications in specific categories divided into sections based on the field you're interested in.

3D MODEL CREATION

LEXICA

Turn your text into visuals in seconds

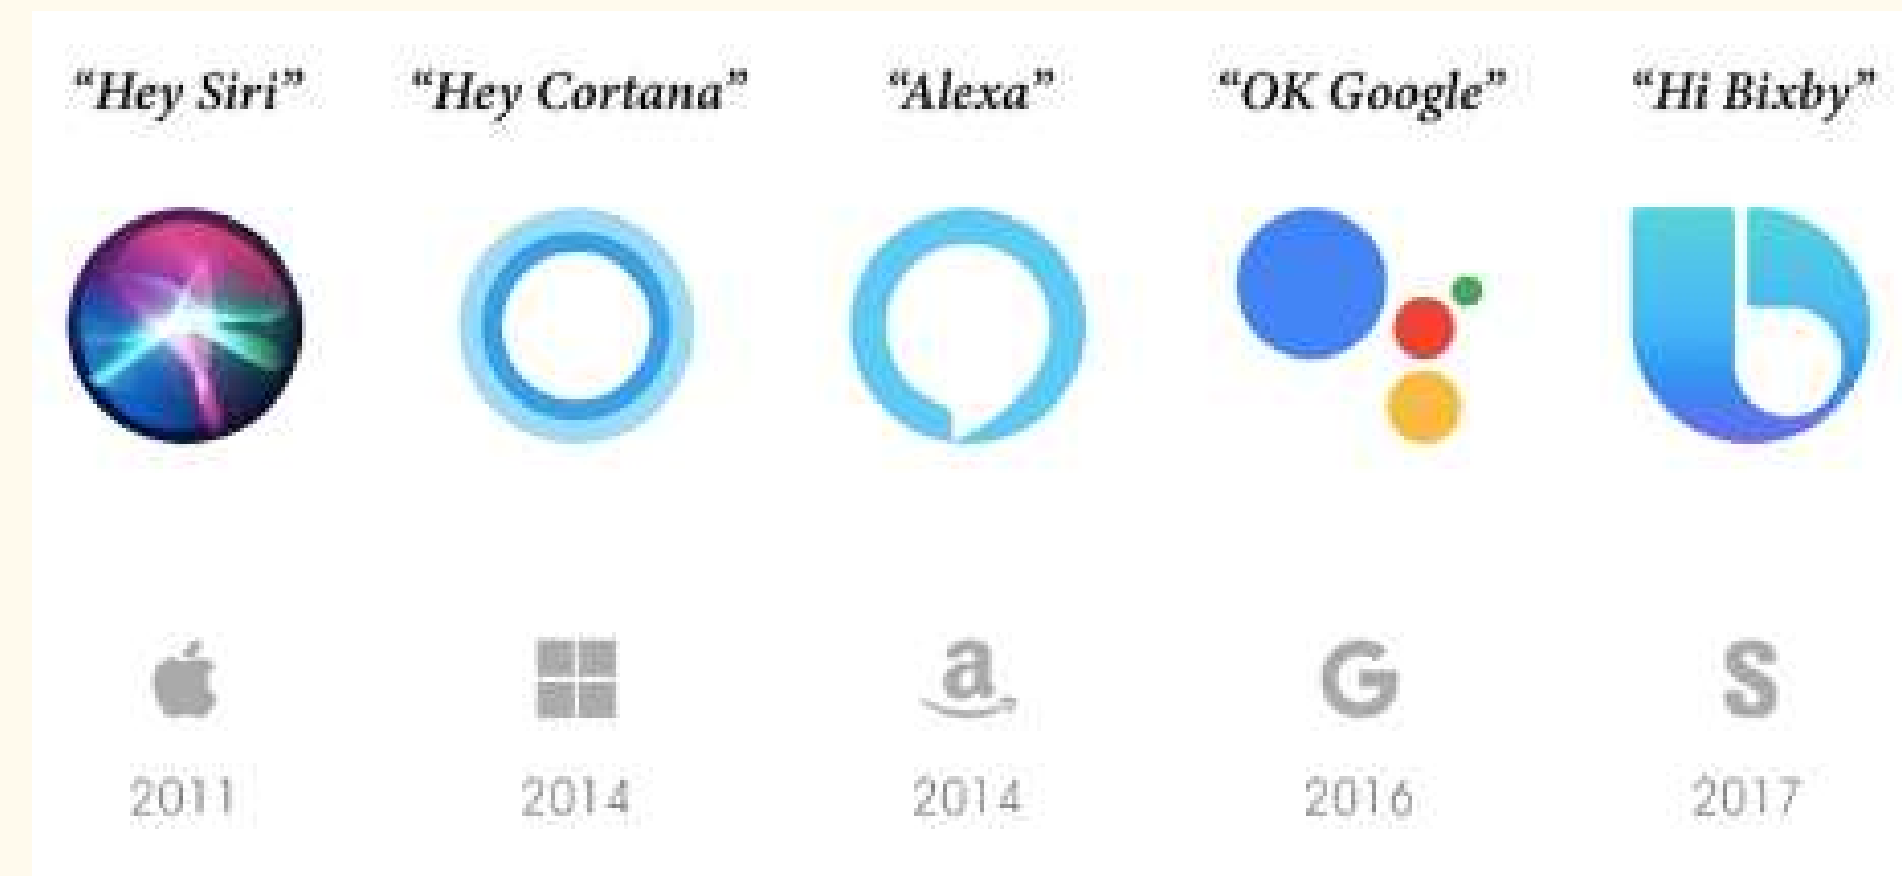

TOME

Tome AI is an AI app that automates presentation creation using a variety of AI-powered tools. A collaborative AI assistant helps users design engaging presentations from scratch. Benefits. Ready-made templates and themes. AI-generated text (titles, headers, and descriptions), images, and animations.

VIRTUAL ASSISTANTS

Natural Language Processing (NLP) is one of the most challenging areas of artificial intelligence, aimed at maximizing human-computer interaction or enhancing communication between speakers of different languages. In NLP, solutions are developed using deep learning, machine learning, statistical analysis, and rule-based approaches. NLP is used for a wide range of applications, from correcting spelling errors to automatic translation systems, language learning apps, and personalized virtual assistant applications.

Nearpod helps educators make any lesson interactive, whether in the classroom or virtual. The concept is simple. A teacher can create interactive presentations that can contain Quizzes, Polls, Videos, Collaborate Boards, and more. Turn your text into visuals in seconds.

Pear Deck is an interactive presentation and lesson delivery tool that can be used via the web or as an add-on or integration with a variety of other programs. Students join teachers' Pear Deck sessions with codes and then use their devices to follow along with the teacher's slideshow on a classroom screen.

EDUCATION COPILOT

Education Copilot is a comprehensive set of AI tools built for teachers. Following prompts, it can provide AI-generated lesson plans, writing prompts, educational handouts, quizzes, project outlines, parent emails, and more.

MAGIC SCHOOL

Use MagicSchool to help lesson plan, differentiate, write assessments, write IEPs, communicate clearly, and more. And now use MagicSchool for Students to bring responsible AI experiences to students and build AI literacy for the next generation.

Otter automatically assigns action items from all your cross-functional team meetings, helping everyone stay aligned. Otter transcribes and summarizes interviews, reducing the time and effort required to evaluate candidates. Otters helps you tell the stories that matter through automated, real-time transcription.

Actionbound is an app for playing digital scavenger hunts by means of installing digital content in the physical world. The content is filled in by the users on the website actionbound.com making actual surroundings a backdrop for the game.

Gamma is a new platform that allows users to create polished documents, presentations, and webpages in seconds using AI. It is designed to make creating engaging content easy without the need for extensive formatting and design work..

MagicSlides.app helps teachers, students, and professionals to create professional presentations in seconds with AI. Create AI Presentation.

EyeJack Creator is an Augmented Reality tool for Artists and Creators to bring art to life as AR with animation and sound. Augment physical art, such as posters, comics, murals, canvases and merch or use our Panels feature to place floating art and animations in the real world.

Quizizz AI Create: this helps you create quizzes in an instant. Whether you've got a prompt, a chunk of text, URLs that are publicly accessible (including YouTube videos with transcripts and descriptions), or documents like PDFs, DOCs, and PPTs - Quizizz AI Create turns them into quizzes with ease
